

**Active Physics Student Recommendation Survey**

Biology  
Biology

Chemistry  
Chemistry

Physics  
Physics 1

Earth Sciences  
Geosystems

**\*Note:** As you are deciding what class to take next year please understand the requirements that are needed for a standard diploma. You need 3 total Sciences from 3 different categories (above). Active Physics and Regular Physics are in the same category

**Please complete the following survey honestly.**

1. You are in Active Physics and a sophomore, junior or senior and have taken Biology and passed the Biology SOL

Yes    or    No

If yes, and your grade in Active Physics is a C- or higher, then you can consider taking

- Geosystems
- Regular Chemistry

If yes, and your grade in Active Physics is a B- or higher, then you can consider taking

- Regular Physics

If yes, and your grade in Active Physics is a D+ or lower, then you can consider taking

- Geosystems

If no, then consider taking

- Chemistry

2. You are in Active Physics and are a freshman, then you will have to take

- Biology

After answering these questions review the **Science Skills Sheet** and circle the courses that apply to you and answer the skills questions for each course.

According to this **survey** and the **science skills sheet** I should take the following course(s)

- 1.
- 2.

My preference would be for the following course

- 1.

\_\_\_\_\_  
(Student Signature)

\_\_\_\_\_  
(final teacher recommendation)
